PROFESSIONAL SUMMARY

DevOps Engineer with **4 years** of experience in AWS, Terraform, Kubernetes, Docker, CI/CD, and DevSecOps. AWS Certified Cloud Practitioner skilled in automating infrastructure, managing cloud environments, and building reliable deployment pipelines. Focused on improving scalability, security, and operational efficiency through automation.

TECHNICAL SKILLS

Cloud & OS : AWS (VPC, EC2, S3, RDS, IAM, Lambda), Linux , Windows
DevOps & IaC : Docker, GitLab CI/CD, GitHub Actions, Terraform, Cloud Formation, Kubernetes, Jenkins, Ansible
Languages : Go (Golang), Python, Bash, JavaScript, SQL
Security : DevSecOps, Trivy, Vulnerability Scanning, IAM Hardening
Observability : Prometheus, Grafana
Certifications : AWS Certified Cloud Practitioner

EXPERIENCE

DevOps Engineer

Infosys | Client: Goldman Sachs Oct. 2022 – Present

- **Built and maintained GitLab CI/CD pipelines** to deploy applications across dev, **UAT, and production** environments, enabling faster, more reliable, and repeatable releases
- **Developed automation features** within the Internal Developer Platform (IDP), reducing manual production interventions by **50%** and enhancing audit compliance
- **Provisioned and managed staging, UAT, and production environments using Terraform**, ensuring consistent and repeatable infrastructure
- **Collaborated with multiple engineering teams across the organization** to support and execute **migrations to UAT and production** environments, ensuring smooth and stable releases

Video Editor

Fiverr Aug. 2019 – Sep. 2022

- **Managed** end-to-end post-production for 100+ global clients, consistently delivering high-retention content under tight deadlines while maintaining a **100%** repeat-business rating.

PROJECTS

Cloud-Native DevSecOps Pipeline | AWS, Docker, GitHub Actions

- **Automated** a zero-downtime CI/CD pipeline for a Node.js microservice using GitHub Actions and AWS **ECS Fargate**, reducing manual deployment overhead by 100%.
- **Hardened** the software supply chain by integrating **Trivy** vulnerability scanning, identifying and mitigating critical security flaws (e.g., CVE-2026-22184) before production deployment.
- **Optimized** container strategy with multi-stage Docker builds and non-root execution, improving security posture and reducing image storage footprint by 60%.

Infrastructure as Code: Multi-Tier Production Environment

- **Architected** a highly available 3-tier AWS infrastructure (Web, App, Database) across multiple Availability Zones using **Terraform**.
- **Engineered** reusable custom modules for VPC, Compute, and RDS, reducing environment provisioning time by 80%.
- **Implemented** Environment Isolation (Dev/Prod) using a file-based directory structure and **S3 Remote State** with native S3 locking.

EDUCATION

Balaji Institute of Technology and Science

Aug. 2016 – Jun. 2019

Bachelor of Technology in Mechanical Engineering
